

Actor-topic network: who posts into which topic

- Organic account
- Broadcast account
- Topic

Topics are pinned on a circle; accounts settle beside the topics they post into. Node size = posts contributed. A topic ringed by many small teal nodes is distributed discussion; one dominated by a few large red nodes is feed-driven. 41 of 372 accounts post into more than one topic, so most of the graph is star-shaped by construction.
