

DEMO SURFACE

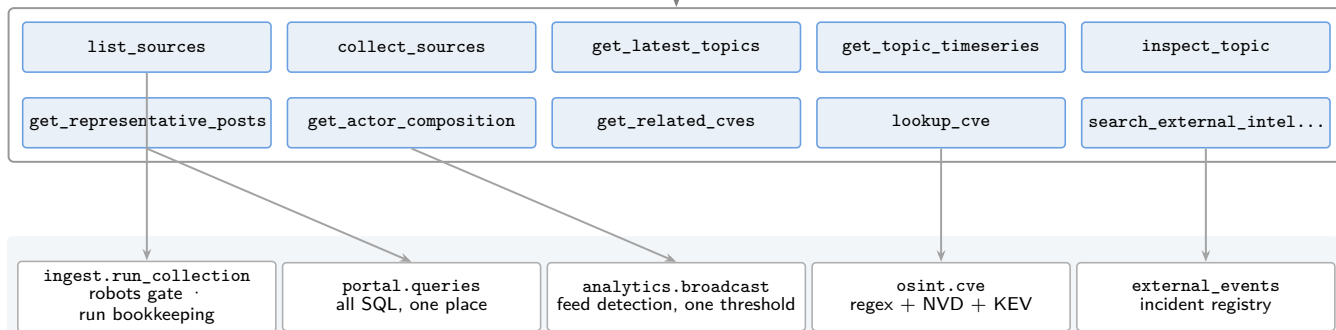

ORCHESTRATION

Standing constraints (system prompt)

- 1 Volume is not attention — report the feed share
- 2 Monitored-source activity, not public opinion
- 3 Movement is not a trend — permutation-tested
- 4 Every claim names source, window and counts

TOOL LAYER — ten tools, pure delegation

EXISTING SUBSYSTEMS

unchanged by this layer — the tools add no statistics of their own

a second copy of a threshold is a second
thing to keep in step, so the tools hold
none: `get_actor_composition` calls
the same feed detector the analysis does
